LEXINGTON, Kentucky – The Bluegrass Higher Education Consortium have finalized a challenging and promising agenda, focused on major transformation in college and career planning, for its second annual Presidents Conference on October 31 at the Griffin Gate Marriott Resort, President Augusta Julian of Bluegrass Community & Technical College and President John Roush of Centre College, co-chairs of the consortium, have announced.

The public is invited to attend the conference. Registration is $80 full conference per person. [www.bluegrasstomorrow.org](http://www.bluegrasstomorrow.org) to register.

The Conference will be highlighted by a luncheon panel discussion focusing on how higher education can help our region attain the goal of college and career readiness and STEM preparedness, that includes new institution presidents Dr. Lyle Roelofs of Berea College and Dr. Michael Benson of Eastern Kentucky University, House Majority Leader Rocky Adkins, David Adkisson President of the Kentucky Chamber, and Lu Young of Fayette County Public Schools. The session moderator will be Gene Wilhoit of the National Center on Innovation and Education.

All of the sessions are focused on advancing the work and discussions related to the goals and principles that were established at last year’s initial Presidents Superintendents Summit:

**Principles & Goals From 2012 Presidents Superintendents Summit**

**Principle 1:** There must be a major transformation in how we approach career planning and preparation, and how we help students make college and career choices.
Principle 2: There must be a new focus on what skills, talents and capacities are necessary for the emerging young adult and tomorrow’s citizen-leader, to define the characteristics of the “ideal young adult.”

Principle 3: There must be opportunities for the well-rounded young adult to become skilled in three important disciplines: 1) STEM (science, technology, engineering, math), 2) the arts, and 3) workplace competencies.

Principle 4: There must be advocacy with government and legislative leaders to address the challenges posed by such ambitious goals, which may challenge the Commonwealth’s educational policies.

Goals:
1. Reduce dropouts from both high school and higher education.
2. Improve college-going rates.
3. Increase the number of associate and bachelor’s degrees in the Bluegrass.
4. Increase the employment opportunities for the resulting highly skilled and educated workforce.

The Bluegrass Higher Education Consortium was chartered in 2012 with the mission of advancing the region both economically and educationally. The 12 participating regionally accredited four-year institutions are: Asbury University, Berea College, Bluegrass Community and Technical College, Centre College, Eastern Kentucky University, Georgetown College, Midway College, Morehead State University, Kentucky State University, Sullivan University, Transylvania University and the University of Kentucky. The Presidents of each institution constitute the executive committee of the board of directors.
